

INTEGRITY FOR FUTURE CO-CREATING HOPE TOUR

A Mobility Partnership | 2026-2028

A tiny ERIBA Puck. A global journey.
A big question: *How do we co-create hope?*

It started with a 1961 ERIBA Puck - one of the early icons of mobile travel. Today, this little caravan has a new life: as a mobile space for conversations about what makes us human and how we want to shape our shared future.

KICK OFF IN DAVOS

In June 2026, the Puck made it all the way inside the Congress Centre in Davos for the Global SME Forum - bringing the work of Integrity For Future into an international setting.

THE TOUR

From October 2026 on Integrity For Future will be taking the conversation further - connecting people, communities and change makers across countries and continents.

At the heart of the *Co-creating Hope Tour* are encounters that invite people to explore questions of integrity, humanity, purpose & hope - and turn these conversations into impulses for action.

Mobility can move more than people.
It can move ideas, conversations - and hope.

The Puck remains our iconic mobile home and conversation space in Europe.

Why traveling the world?

Because there is a story to be told.

Mobility can be more than getting from A to B. It can connect people. Open conversations. Bring different worlds together. And carry an idea further than it could ever travel alone. The Co-creating Hope Tour is the space where the local, the regional & the global meet - based on human stories.

WE ARE LOOKING FOR A MOBILITY PARTNER

1 | Keep the Puck moving

A monthly partnership contribution supporting Puck on Tour as the mobile home and European project office of Integrity For Future - whether it is currently travelling or creating impact from one location.

2 | Move the Co-Creating Hope Tour

Mobility support for the international journey: vehicles and rental solutions where possible, complemented by support for flights and local mobility - with Egypt, South Africa, India and countries in Europe as important upcoming destinations.

WHAT WE BRING

What we bring in is a remarkable ERIBA heritage story with a new purpose. A highly visual travelling project. Authentic encounters and stories from the road. And 8 billion people coming back to the deep care for life our species is made for.
